

FlyerChimp

Group 15

Overview

- The goal was to create a dashboard that will help students learn about and partake in a variety of campus events, clubs and services for students at the University of Toronto.
- Create an intuitive user interface for students to view and/or make their own postings.
- Provide greater accessibility for students to see all types of postings on a single application.
- Save time and effort when selecting which campus events, clubs, and services to participate in.

Planned Epics

Event Details

Event Reminders

Reporting Events

Tracking Events

Finding Events

Viewing Profiles

Leaving Reviews

Draft
Research and choose a database to implement

Draft
Set up database for local development

Draft
1.1 As a busy engineering student, I want to be able to view the time, location and a description of the event to plan my schedule ahead.

Draft
1.2 As a club manager, I want to easily add the details of my event to my post so that people who want to come to my event can find it easily and know what my event is about.

Draft
2.1: As a student, I want to receive reminders of events so that I will not miss an event that I am interested in.

Draft
2.2: As a club manager, I want to send out reminders to students who are interested in the event so that the event will have a higher turnout rate.

Draft
3.2 As a club manager who saw someone reporting my flyer for misinformation, I want to be able to edit my flyer, so that I can change the event details when I accidentally type information wrong.

Draft
3.1: As a first-year student looking for a tutor, I want others to be able to report events, so that I am not at risk of being scammed by a flyer, as anything that is not run by the university seems scary to me.

Draft
4.1: As a student with an overloaded course load and a lot on my mind, I want to be able to quickly lookup the information on events I am interested in, so I can evaluate whether I can make it to an event.

Draft
4.2: As a student, I want to be informed on any conflicts between events I'm keeping track of, so I don't inadvertently miss an event without realizing it.

Draft
5.2 As a student, I want to be able to search for specific events so that I can find desirable events faster.

Draft
5.1 As a student, I want to be able to filter events so that I can find desirable events faster.

Draft
6.1: As a club manager, I want to see who is coming to the event hosted by my club. -

Draft
6.2: As a first-year student new to campus, I want to see more information about the club that posted the event.

Draft
7.1: As a student, I want a way to recommend new students to a club I had positive experiences with

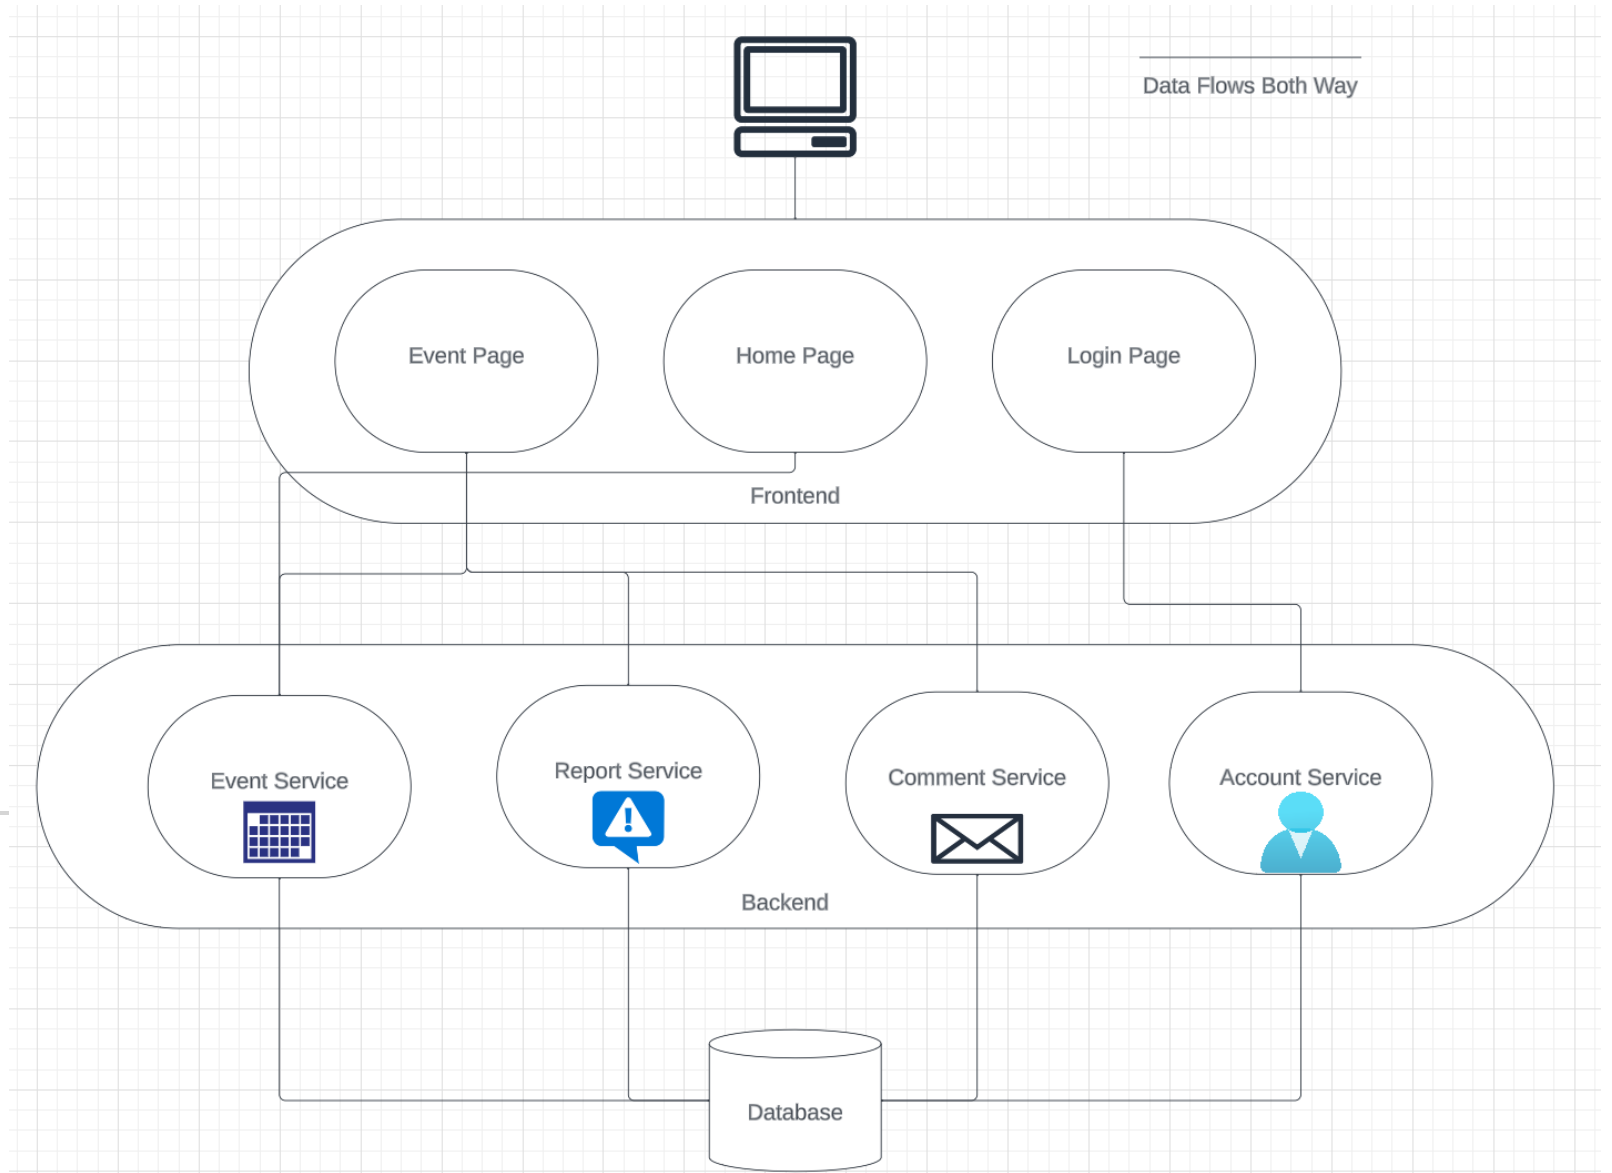

Draft
7.2 As a student, I want to be able to express approval or "like" a posting or message

Draft
Write user documentation
